

ELB 1200

Dock

Press Release

ELINCHROM BREAK-OUT

Elinchrom introduces a docking station for the ELB 1200 unlocking the full potential of the ELB 1200's system.

July 27, 2018 Renens, Switzerland

Following the launch last year of the ELB 1200 which was widely applauded for its lightweight portability, weather resistance and astonishing performance from the choice of two battery options, Elinchrom have just announced the Dock.

The Dock

The Dock is a mains powered docking station enabling Elinchrom users Worldwide to base themselves in the Studio, and simply break-out to wherever their next adventure may take them, with their battery in place of the Dock.

Stills and Videos

Obvious advantages of the Dock are the freedom to shoot both stills and video endlessly whilst in the studio, plus the freedom over a conventional mains powered pack to continue playing outside the studio.

Your Studio. Wherever You Want To Be.

Unlock the potential of the ELB 1200's system. With the choice of a mains solution and two batteries, you can follow your inspiration wherever it takes you.

Stay in your studio or go out on location, the choice is yours.

Welcome to a World of Adventure !

DOCK
